

HEMEROCALLIS

Stella Citron[®]

SUNNY YELLOW
DWARF DAYLILY

A bright new addition to the garden, this sunny yellow Daylily is bred from the ever-popular Daylily 'Stella Bella'. Compact in form and neat in habit, it features clean, strappy foliage and an abundance of cheerful, lily-like blooms that continue to flower throughout the warmer months. With its reliable, recurring display and low-maintenance nature, it's a standout performer in any setting. Whether planted in small clusters, dotted through mixed borders, or used en masse for sweeping drifts of colour, this Daylily brings lasting vibrancy and structure to the garden.

FEATURES

- Dwarf habit with flowers proud of the foliage
- Evergreen selection
- Fast growing plant that has a quick impact
- Repeat flowering with a spring and autumn peak

USES

- Low maintenance cottage garden plant
- Flower borders and perennial gardens
- Easy-care containers and patios
- Showy ground cover

CARE

Low water requirements once established, will perform best with summer irrigation and well-prepared soil. In containers, the removal of spent flower heads can encourage repeated flowering through the season. Apply a slow release fertiliser in spring for the best results.
