

Anemone x hybrida 'Regal Swan'

↑ ↓ Height 60cm
 ← → Spread 50cm

FEATURES:

- Long display of very large flowers, soft pink with darker centres and very dark blue on reverse.
- Flowers from late summer through autumn.
- Ideal for low light areas.
- Easy to grow with minimal maintenance.

SUGGESTED USES:

- Water wise landscapes and general garden use.
- Suitable for containers in low light areas.
- Suitable for urban/city environments.
- Can be mass planted for low maintenance areas.
- Wildflower and cottage style gardens.
- Cut flowers last well in floral displays.

CULTURAL CARE

Grows well in most soil types that are moist but well draining. Occasional long soaks during extended periods of heat is recommended.

Remove spent flower stems to tidy.

Feed during spring with a slow release fertiliser for best results.

Mulch well to retain moisture during dry periods. May become deciduous in colder regions with fresh foliage re-appearing in late winter to spring.
