

Brachyscome angustifolia 'Radiant Magenta'

Height: 25cm
Spread: 40cm

FEATURES:

- Showy display of bright magenta, daisy like flowers over many months from spring through to autumn.
- Foliage forms an easy care, compact mound which can form a mat and/or spill over edging.
- Pollinator friendly native plant.

SUGGESTED USES:

- Great for mixed borders, containers and hanging baskets.
- Can be grown en masse as ground cover.
- Ideal for cottage, native or wild flower gardens.
- Will spill over retaining walls or rockery walls.

CULTURAL CARE

Low maintenance and easy to grow.
Grows well in most soil types given good drainage. Water wise once established but should be given occasional deep watering during extended periods of heat.
Regular light trims will encourage repeat flowering and maintain a neat habit.
Apply a slow release fertiliser in spring for optimum results.
