

CEANOTHUS

'PACIFICWAVE'

SELF BRANCHING HABIT

Very few plants do blue as perfectly as the ever popular Ceanthus, and this selection from the Lambley's breeding program is an exciting new addition to the genus. Compact in growth and incredibly hardy. Needing little to no pruning and minimal water makes it the ideal choice for many applications. Ideally suited to small or large gardens, containers for a short period or even en masse in landscapes, roadside plantings or commercial applications. The flowers are a gorgeous stormy sea blue and appear for many weeks during the spring to early summer. The foliage is a clean and refreshing green all year round. Another outstanding selection from the renowned and highly acclaimed Lambley Nursery, Australia.

FULL SUN

DRY TOLERANT

FROST TOLERANT

HEIGHT 60-80CM

SPREAD 1.5M

FEATURES

- Tight low mounding habit
