

LITTLE BLUE BUTTERFLY

Delphinium 'Blue Butterfly'

Height: 40cm
Spread: 30cm

FULL SUN

MIXED BORDERS

CONTAINERS

LONG FLOWERING

POLLINATOR PLANT

FEATURES:

- A compact, short growing form with free branching display of deep blue flowers.
- Eye-catching display from spring into summer.
- Easy to grow with reliable garden performance.

SUGGESTED USES:

- Excellent for growing in containers.
- Focal point for front of mixed borders.
- Lasts well as a cut flower in arrangements.
- Pollinator attracting.

CULTURAL CARE

Grows well in most soil types which are moist but well draining.

Remove spent flower stems to prolong flowering display. Prune off up to half of older foliage once new growth appears in spring to encourage new growth from base. Apply a slow release fertiliser in spring. Mulch well to help retain moisture during dry periods.
