

*Euphorbia martinii* Walbertons Ruby Glow

 Height: 50cm  
 Spread: 50cm

## FEATURES:

- Very ornamental Euphorbia with deep red wine coloured foliage year round.
- Naturally compact habit.
- Sprays of tiny, lime yellow flowers appear from late spring through to summer.
- Low maintenance and easy to grow.
- Dry tolerant once established.

## SUGGESTED USES:

- Water wise for gardens or containers.
- Small gardens or spaces.
- Fast results for new gardens.
- Suitable for coastal regions.
- Colour and interest for all months.

## CULTURAL CARE

Very low water requirements. This variety is dry tolerant once established. Plant in most soil types. Requires good drainage if receiving regular irrigation or in areas of high rainfall. Euphorbias do not like wet feet. Feed in spring with a slow release fertiliser. Pruning generally not required although cutting back spent flower stems to base will encourage a bushier habit. Take care to avoid skin contact with the milky sap as it can be irritating to some - wear gloves and dispose of cuttings. CAUTION Harmful if eaten/skin & eye irritant.
