- Fast results in containers or general garden use.
- Colour for undercover entertainment areas and other low light situations.
- Mixed borders, small or narrow spaces.

CULTURAL CARE

Grows well in most soil types which are moist but well draining. Water regularly - apply a layer of mulch to help conserve moisture during extended periods of heat. Pruning generally not required although a light trim after main flowering flush will help to maintain a neat, dense habit. Apply a slow release fertiliser during spring. Offer protection where frosts may occur and from strong afternoon sun.
