

Farfugium japonicum var. *giganteum*

 Height: 1m
 Spread: 80cm

FEATURES:

- Striking large, glossy foliage of deep green.
- Stems of yellow daisy-like flowers rise from the foliage from late summer into autumn.
- Flowers are attractive to pollinators.
- Easy to grow and low maintenance.

SUGGESTED USES:

- Dramatic foliage for feature uses.
- Great for edging around ponds and other areas which remain moist.
- Suitable for large containers indoors in a brightly lit position.

CULTURAL CARE

Low maintenance and easy to grow in most soil types which are moist. Average watering but do not allow to dry out during extended periods of heat. Enjoys a semi shaded location but can tolerate full sun if avoiding harsh afternoon heat. No pruning generally required. May become herbaceous in very cold regions with fresh foliage re-appearing in spring. Apply a slow release fertiliser during spring for optimum results. Give protection from snails and frost. Mulch well around plant to help retain moisture but keep back from touching stems.
