

Lobularia hybrid 'Blushing Princess'

Height 20cm
Spread to 40cm

FEATURES:

- A perennial version of the popular annual 'Sweet Alyssum'.
- A mass display of soft lilac, flushing to white coloured flower heads throughout the year.
- Attractive silvery green foliage forms a low ground covering mound.
- Flowers have a sweet honey like scent.
- Easy to grow with fast results.
- Pollinator favourite plant.

SUGGESTED USES:

- Mass plant large drifts for decorative ground cover.
- Great for container or hanging basket displays.
- Soft edging for paths or paved areas.
- Will cascade over retaining walls, rockeries and embankments.

CULTURAL CARE

Grows well in most moist but well draining soils. Frost tolerant and water wise once established but should not be allowed to dry out during extended periods of heat. In a hanging baskets or containers more regular watering may be required. Apply a slow release fertilizer during early spring and mid summer for optimum results. No dead-heading necessary for continuous flowering. No pruning required although can easily be trimmed back if you wish to reduce overall size.
