

Helichrysum amorginum 'Red Jewel'

Height: 30cm
Spread: 40cm

FULL SUN

MIXED BORDERS

CONTAINERS

LONG FLOWERING

WATER WISE

FOLIAGE PLANT

POLLINATOR PLANT

FEATURES:

- Long flowering
- Velvety, silver grey foliage year round.
- Clusters of bright red buds in spring opening to papery, pink flowers in spring.
- Neat, dense habit which forms a low and compact mound.
- Dry tolerant once established.

SUGGESTED USES:

- Dry or gravel gardens and rockeries.
- Small gardens/spaces.
- Containers and general garden use.
- Pollinator friendly plant.

CULTURAL CARE

Select a sunny location in soil types that are well draining - does not tolerate wet feet.

Once established watering requirements are low requiring only occasional long soak during extended periods of heat.

No pruning generally required. A light trim after main flowering flush will help promote a neat habit. Apply a slow release fertiliser in spring and autumn for optimum results. Protect from frost.
