

Lewisia cotyledon 'Safira Coral'

 Height: 25cm
 Spread: 20cm

FEATURES:

- Dainty in looks, tough in habit.
- Sturdy stems of coral-pink flowers produced throughout the warmer months.
- Forms a dense rosette of green fleshy foliage.
- Easy to grow and low maintenance.

SUGGESTED USES:

- Perfect for small spaces, containers or baskets.
- Add colour to patios, verandahs and entertainment areas.
- Water wise gardens and rockeries.
- Low growing for edging paths and paving.
- Mass plant for striking, long lasting colour.

CULTURAL CARE

Low maintenance and easy to grow in most soil types but requires good drainage - do not allow to remain wet for long periods. Dry and frost tolerant once established. No pruning required although removing spent flower stems will encourage further flushes. Apply a slow release fertiliser during spring for optimum results.
