

Rehmannia elata 'The Empress'

Height to 60cm
Spread 60cm

FULL SUN

PART SHADE

MIXED BORDERS

CONTAINER

POLLINATOR FRIENDLY

FEATURES:

- A compact form with long display of large pink blooms from late spring through to autumn.
- Fast growing for mixed borders or containers.
- Easy to grow.

SUGGESTED USES:

- Containers or general garden use.
- Quick results in new gardens.
- Small or narrow spaces.

CULTURAL CARE

Best results when grown in rich, moist soil or containers using a good quality potting mix. Will become herbaceous in cold regions during winter - any remaining, older foliage should be removed by late winter to tidy. Cutting spent flowering stems during display period will encourage further blooms. Mulch well to retain moisture during dry seasons and apply slow release fertiliser both in spring and late autumn to achieve best results.
