

Viola 'Black Shadow'

 Height 20cm
 Spread 50cm

FEATURES:

- Massed displays of dramatic black coloured, fragrant flowers
- Long flowering perennial variety - main flush mid winter to spring with some flowers continuing through to autumn.
- Neat, dense habit.

SUGGESTED USES:

- Ornamental edging or for filling small spaces.
- Rockeries and small gardens.
- Containers or hanging baskets.
- Mass plant for a bright border display.

CULTURAL CARE

Grows well in most soil types which are moist but well draining.

Give some protection from strong afternoon sun during summer.

Prune during late summer to increase performance in autumn and to promote dense habit.

Apply a slow release fertiliser during early spring or after pruning. Mulch well to help retain moisture during dry periods.
